```

**Structural
Directive**

**Component
Directive**

**Attribute
Directive**

ngIF

ngFor

ngSwitch

ngClass

ngStyle

ngModel

Types of Directives

```
graph TD; A[Types of Directives] --> B[Component]; A --> C[Structure Directives]; A --> D[Attribute Directives]; B --> E[Directives with a template]; C --> F[Change layout of the elements]; D --> G[Change appearance or behavior of a particular element];
```

Component

Directives
with a
template

Structure Directives

Change layout
of the elements

Attribute Directives

Change
appearance or
behavior of a
particular element

```
<!--An extra Div element will be added-->
<div *ngIf="shouldShow">
  <div *ngFor="let order of orders">
    <li>Order:{{order.ordername}}</li>
  </div>
</div>
```

using *ngFor and *ngIf
on same element

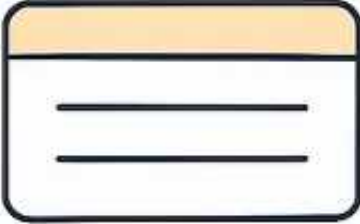

```
<!--ng-container wont be added to the DOM-->
<ng-container *ngIf="shouldShow">
  <div *ngFor="let order of orders">
    <li>Order:{{order.ordername}}</li>
  </div>
</ng-container>
```

Component

`<app-hello>`

↓

Structural

`<div>`

`*ngFor ...`

`<li>`

`</div>`

Attribute

`[ngClass]`

Custom Angular Directives
