

ANGULAR SETUP

codewithritu_09

1. Download and Install **Visual Studio Code** from <https://code.visualstudio.com/download>

2. Download and Install **Node JS** from <https://nodejs.org/en/download> .

OR

You can test whether the NPM is installed or not by using this Command Prompt.

if NPM is installed , then it will return the version No (eg 10.9.2)

3. Install the **Angular CLI** using Command Prompt.

```
npm install -g @angular/cli
```

Check Angular CLI version using Command prompt.

```
ng --version
```

if Angular CLI is properly installed, then it will be return version no (Eg. 19.2.10)

4. Create a Workspace and initial application.

```
ng new my-first-app
```

5. Run the application.

```
cd my-first-app  
ng serve --open
```
