

Angular developer interview questions

**Categorized based on different
aspects of Angular**

Basic Angular Questions

1. What is Angular, and how is it different from AngularJS?
2. Explain the architecture of Angular.
3. What are components in Angular?
4. What is the role of the NgModule?
5. What is TypeScript, and why is it used in Angular?

Components, Directives, and Templates

1. What are Angular directives? Explain different types of directives.
2. What is the difference between structural and attribute directives?
3. Explain ngIf, ngFor, and ngSwitch.
4. How do you create a custom directive in Angular?
5. What is a component lifecycle, and what are its hooks?

Data Binding & Dependency Injection

1. What are the types of data binding in Angular?
2. What is two-way data binding?
3. Explain dependency injection in Angular.
4. How do you create and use services in Angular?
5. What is the difference between `@Input()` and `@Output()` decorators?

Routing & Navigation

1. What is Angular Routing?
2. How do you configure routes in Angular?
3. What is Lazy Loading, and how does it improve performance?
4. How do you pass parameters in routes?
5. What is RouterOutlet, and how is it used?

Forms in Angular

1. What are Template-driven and Reactive Forms? What is the difference?
2. How do you validate forms in Angular?
3. How do you use FormGroup and FormControl?
4. What is the difference between setValue() and patchValue() in forms?
5. How do you create custom form validators in Angular?

HTTP Client & Services

1. How do you make HTTP requests in Angular?
2. What is the difference between HttpClientModule and HttpModule?
3. What are Observables, and how are they used in Angular?
4. What is the difference between Promises and Observables?
5. How do you handle HTTP errors in Angular?

Performance Optimization

1. What are some best practices to improve Angular performance?
2. What is Change Detection, and how does it work?
3. How do you optimize Change Detection?
4. What is the difference between OnPush and Default Change Detection strategy?
5. How does Ahead-of-Time (AOT) compilation improve performance?

State Management & Advanced Topics

1. What is NgRx, and why is it used in Angular?
2. What is the difference between BehaviorSubject, Subject, and ReplaySubject?
3. How do you manage global state in Angular applications?
4. What is Angular Universal, and why is it useful?
5. Explain how SSR (Server Side Rendering) works in Angular.
